- **Telecom Engineering, Furnish & Installation**
- **Consulting**
- **Custom Automation Manufacturing**
- **Home Automation**
- **Broadband Services**
- **Solar, Wind Farms, & Geothermal Energy Systems**

We can provide Electrical Contracting services to General Contractors, individual upscale custom homeowners, and light commercial (warehouses, office complexes, restaurants, and microwave towers). We have vast experience in the communications field, providing high voltage and low voltage installations. Our heritage goes back to the days of Western Electric and our team brings over 50 years of experience in Telecommunications. We have supplied the Telecommunications, Electrical, Utility, Power & Transmission, Fiber Optics, and CATV Industries as a "single source" one-stop shop for hard to find Tools, Supplies, and Installation services. We supply new projects just starting up, as well as established operations and welcome your inquiries on any tooling you may require, shipping to company headquarters, as well as designated job sites with quick overnight response when necessary.

We are always seeking teaming partners and subcontracting opportunities.

With a Statement of Work (SOW) we can provide our:

PRODUCTS: Tools, Equipment, Supplies, Laser Optical components, Telecom Software

SERVICES: Telephone Central Office & Outside Plant Installation, Network, Data, Voice, Internet, Calibration, Distribution, Manufacturing, Project Management, Technical support, Generator Back up power, Battery Power Leasing, Low voltage, DC Power
